Summary

Full Stack Developer with strong experience in front-end development, REST APIs, third-party integrations, and full-stack web application development across manufacturing and insurance industries. Experienced in building scalable systems, improving business workflows and collaborating across teams to deliver reliable software solutions.

Experience

Software Engineer @ Poulton Associates, LLC

April 2012 to June 2022 | Salt Lake City, UT

- Built and shipped front-end features for an insurance quoting platform, integrating third-party APIs for data intelligence and policy data reconciliation. Modernized public-facing pages and collaborated on internal tools and REST APIs to improve workflows and support business needs.
- Enhanced transaction reporting workflows by automating the reporting of business transactions to the appropriate state's surplus lines association, improving efficiency and reducing manual processing.
- Contributed to the design and development of a full-stack, standalone document generation system, improving document generation speed, supporting template-based document creation, and providing a scalable foundation for growing business demand.
- Contributed to the design and development of a full-stack, standalone rules engine for managing underwriter risk criteria, supporting automated underwriting for applications that met defined criteria.
- Mentored front-end engineers, promoting consistency, maintainable code, and shared development practices across the team.

Senior Software Engineer @ DataNinja, Inc.

September 2023 to Present | Salt Lake City, UT

- Built and shipped front-end features for a MES (Manufacturing Execution System) platform, collaborating with the team to deliver new functionality and improve the overall product experience.
- Implemented localization enhancements for the MES platform, adding Spanish language support to improve accessibility and provide Spanish-speaking clients with a more seamless application experience.
- Enhanced UI workflows across the MES platform, including sales order inspection, material reservation management, and third-party ZPL integration for managing label templates and printing labels.
- Supported ERP integrations, including NetSuite, helping ensure smooth data synchronization between systems. Participated in customer support rotation and provided on-site support during software implementations, working directly with customers to troubleshoot issues and help ensure a successful rollout.
